Brian M. Adams
Machine Intelligence and Visualization

April 14, 2026

To Whom it May Concern:

Sandia National Laboratories (Sandia) is pleased to participate with Virginia Polytechnic Institute and State University in their response to DOE's Request for Applications, "The Genesis Mission: Transforming Science and Energy with AI" (DE-FOA-0003612). The title of the proposal is "Provenance-Aware Agentic Knowledge Graphs for Trustworthy AI in Scientific Research."

Virginia Polytechnic Institute and State University has requested Sandia's unique capabilities be included in their response to this RFA. Subject to available funding and resources, Sandia anticipates participating in mutually agreed tasks, which will be performed by staff in the Machine Intelligence and Visualization department at Sandia.

Sandia intends to assist in design, development, and evaluation of an agentic AI system that leverages knowledge graphs built from scientific documents and related code documentation to provide provenance-aware generations. Sandia anticipates providing insight into the need for trustworthy AI systems in high consequence settings and providing continual alignment to mission needs and trust calibration for users of such a system.

Sandia National Laboratories is a government-owned-contractor-operated facility operated by National Technology & Engineering Solutions of Sandia, LLC (NTESS) for the U.S. Department of Energy (DOE)/ National Nuclear Security Administration (NNSA) under Management and Operating (M&O) Contract DE-NA0003525. As a DOE M&O Contractor, NTESS is obligated to offer its unique services to entities that wish to acquire these services using a DOE-approved agreement mechanism. Providing Sandia's services to Virginia Polytechnic Institute and State University is subject to DOE review and approval in accordance with DOE policies and regulations. These services may be acquired under a DOE-approved bilateral contract with Sandia post award. Sandia implements internal training that aligns with research security training guidelines and is consistent with 42 USC 19234 and DOE Order 486.1A.

This information is provided in accordance with applicable DOE policy regarding Sandia's participation in federal government announcements. The Sandia point of contact for this potential collaboration is Dr. Scott T. Steinmetz, Sandia National Laboratories, P.O. Box 5800, Albuquerque, New Mexico 87185.

Sincerely,

Brian M. Adams
